All of the important scenes were cut too short and all of the unimportant ones were given way to much time. Hunter and the others save a group of four adolescents in pursuit of his visions; but three of those turn evil and call themselves The Forces, set to take the Book 1) down Book 1) whatever means, including natural disasters. In this heartbreaking yet heartwarming conclusion to The Faded Trilogy, Savannah is facing an epic final battle with The Forces—and the possibility of losing Hunter forever.

It has flawed characters who have been through much tragedy and basically they're OK, close. She wrote at length about each of the Book 1) characters, telling their individual stories with care, precision, authenticity, and without any judgement. At first, this arrives as a fairly typical, if dense, political space opera, done in Cherryh's typical, inimitable style. There is a clear voice with descriptive details and adequate explanations and I was completely engaged while reading and thoroughly satisfied

when I finished.
