Do not rotate the coupling. If a machine operated only 8 hours a day for a year, the actual lubrication interval would be increased by three times, since the machine is running only one-third of the time available in a year.

Butasbuilding,municipal,orindustrialsiteneedschange,thepumpmayhav
The heating and cooling will break the rust bond and allow penetrating oil to be used more effectively. This means that the same horsepower, speed, and enclosure will normally have the same frame size from different motor manufacturers. NewArrivals.Inthatcase,roughalignmentisbetterthan.The industry must change—for its own good and that of its customers.
