He explains why some scientists now theorize that the universe may have begun—and may end—with a "big splat," and explains the "ekpyrotic scenario," which says a parallel universe, like a giant membrane, may be floating toward our universe.

Goodreads is the world's largest site for readers with over 50 million reviews. Estimated between Wed.

It's five years old at this point and so is somewhat dated, but the history and... But, it quickly jumps into in depth science and theory. Seife also explains how large-scale projects in Louisiana and other sites are aimed at detecting gravity waves, one of the holy grails in science.

At the publication date it was completely up-to-date, but now 6 years later I... galaxy hunters and microwave eavesdroppers, gravity theorists and atom smashers, all of whom are on the trail of dark matter, dark energy, and the growing inhabitants of the particle zoo—now know how the universe will end and are on the brink of understanding its beginning.
