Let's dive into fossils that scientists just can't explain. Harvard University's Stephen Jay Gould perhaps best captured the charisma of Cambrian life in his book Wonderful Life: The Burgess Shale and the Nature of History in which he lavished attention on the "weird wonders" excavated from Walcott's city block-size quarry. See Subscription Options.

Fun with fossils Jurassic 'monster' fossil rewrites crocodile history See Stars Screen Binge Culture Media. The Qingjiang biota may also help solve mysteries regarding enigmatic ancient groups of creatures such as the somewhat tadpole-shaped vetulicolians. Scientists have debated over whether ctenophores, sponges or cnidarians and specimens show that poor fossil preservation, rather than mass extinction, was probably responsible for this gap in the fossil record.
